**Analysing the role of complexity in explaining the fortunes of technology programmes: empirical application of the NASSS framework**

Ideally, community evaluation is an early and central part of the initiative's support system.

**Synthesis of study findings**

Questions of this nature reveal new aspects of the intervention. Paper presented at the 2005 Systems of Care Communities Meeting, Dallas, Texas. Oral Health information systems--towards measuring progress in oral health promotion and disease prevention.

**What works to improve the quality of student learning in developing countries?**

Only four programmes were explicitly targeted at children with specific types of symptoms. Professionals highlighted a lack of options for children whose parents were not yet ready to engage in an intervention.

**What works to improve the quality of student learning in developing countries?**

The dissemination process promotes the use of the evaluation if it is done well.

**Synthesizing information systems knowledge: A typology of literature reviews**

Domain 7: Embedding and adaptation over time 7A.

**Evaluation of Child Health by Basic Indicators of Health: Historical Series 2005**

The overarching conclusions for each of the research questions form the basis of the recommendations set out in.

**Evaluation of Child Health by Basic Indicators of Health: Historical Series 2005**

It is therefore enough to draft the question in relation to the highest level of use question for decision-making or judging. In the late 1980's, community-based grantmaking emerged as a new or re-discovered way to distribute resources.
