Indigenous communities deserve the spotlight for their role in research that led to watershed advances in vaccinology and pneumococcal epidemiology. However, there are concerns that maternal antibodies may interfere with subsequent immune responses following administration of PCV among infants.

The climatic data of Makurdi and Makurdi-Nigeria as a site were used for the simulation.

1st Annual Medical Scientific Conference January 29th

The rapid transcriptomic reprogramming by both host and pathogen underscores the dynamic responses that drive successful pneumococcal colonization and facilitate invasive disease. This is intuitively easy to understand, as the longer it takes for the pneumococcus to transmit, the greater the chance that the host will receive an antibiotic prescription for any infection. Despite abundant energy sources such as solar, tidal energy, wind, and biomass in Nigeria, the nation is still one of the least electricity consumptions per capita in Africa.
