Don't Be Fooled: Alberta Is Still Playing the Coal Game

There is very little clarity on the scope of what the committee is being asked to do — and what it is in fact allowed to do, he added. The fact that the consultation is being led by the Department of Energy is itself a concern. Given that water is already fully allocated in the Oldman River watershed, junior rights holders may not receive their full allocation during drought years.

The Coal Hard Facts: What's Happening with Alberta's Coal Policy?

Banner: A mine in B.

Coal policy engagement

Six different scientists with expertise ranging from hydrology to land ecology contributed to the reports. It would be an understatement to say that the last few months have been a whirlwind for environmental and conservation battles in Alberta. Crown Leasing Policy The Crown the Department of Energy grants rights to the publicly owned coal in the form of leases issued under the terms of Part 2 of the Mines and Minerals Act MMA.

Aussie Coal Mines Pose Big Threat to Southern Alberta's Water: Study

Although detailed results of the survey were not released, the government official also said that most respondents expressed concerns about coal exploration and are interested in participating in the engagement process through additional online surveys and virtual meetings. However, the move alarmed multiple groups — including ranchers, environmental and First Nations groups as well as municipalities — worried about the potential effects of mining on water quality, property values, wildlife habitat and more.

Coal policy engagement

The industry, just like oil and gas, also has a long and troubled history of securing funds for reclamation. Public outrage and action around this

decision has been growing. The design of the online survey has also raised eyebrows.

Alberta is opening parts of Rockies to coal mining. Here's what that looks like

The notes on page 18 should be studied carefully in order that the significance of the analyses may be thoroughly understood. The recommendations of a joint federal provincial environment assessment review on one of the proposed mines, the Grassy Mountain project, are this Friday.

Coal Policy Engagement

Crown Royalty Policy The Crown reserves a royalty on all leases or other dispositions of Crown minerals under the MMA. Additionally, the province announced the sale of 11 new coal leases in the Eastern Slopes in December 2020 — an announcement they quickly reversed in the face of public opposition.

On the other hand coal mining would consume large chunks of that natural capital and change the quality and quantity of water for downstream users forever, added Stelfox. Annual rent is due on or before the lease anniversary date. The coal mining industry in Canada has faced numerous setbacks recently, with public and political backlash making it increasingly difficult for companies to get approvals for new coal mines and expansions.
