### Processed foods: contributions to nutrition

The difference is mainly attributed to the finding of chlorate residues, a compound that was included for the first time in the 2016 control programmes to support ongoing work to establish maximum residue levels MRLs. The GDACS provides near real-time alerts about natural disasters and tools to facilitate response coordination, including media monitoring, map catalogues and the Virtual On-Site Operations Coordination Centre. The reference guide shows the Daily Value changes for nutrients updated for the new Nutrition Facts label.

### Nutrition Education Materials

The designations employed and the presentation of material at this site do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

### Scientific topic: Plastics and plastic recycling

These fun placemats were designed by the Consumer Financial Protection Bureau in collaboration with Meals on Wheels America.

### Pesticides in food: latest figures remain steady

The hotline is managed by the US Department of Agriculture USDA. Available in Arabic, Simplified Chinese, Hindi, Korean, Russian, Spanish, Traditional Chinese, and Vietnamese. It serves as a gateway to reliable information on nutrition, healthy eating, physical activity, and food safety for consumers.

### Resources & Publications

All data displayed on this site is for general informational purposes only and should not be considered a substitute of a doctor's advice. However, they also found that the available data were insufficient to conclude on the safety of these processes for the main use of these materials in plastic

milk bottles and trays for animal products.
