The Concept of Civil Society and Its Significance on Development Practice

The productive apparatus of the countries of the periphery is thus not the reproduction of that of the centre at an earlier stage of its evolution. Another relevant aspect is the fact that our boundaries are disappearing.

Postdevelopment Theory

At the same time, these policies were further enabled by the compromises made after 1945, which meant a commitment to a liberal international order on the part of the hegemonic power, but a recognition that some protectionism could take place, including in the developing world.
