## The History of Laptop Computers

ENIAC was designed by and of the University of Pennsylvania, U. S. A. The single-board SIM4-02 is shown at the right plugged into an Intel MCB4 chassis along with a PROM programmer card. It is intended for interactive individual use, as opposed to a system where the end user's requests are filtered through operating staff, or a system in which one large processor is shared by many individuals.

ENIAC

HBM was released in 2013. By the early 1990s, Claris applications were shipping with the majority of consumer-level Macintoshes and were extremely popular.

## Personalized Story Books

With his supply guaranteed, and good control over the component pricing, Tramiel launched a war against TI soon after the introduction of the Commodore 64. Choose from a range of stories all created by our award-winning teams of talented authors and illustrators. Since 2010, Apple has also offered the as a means to control Macintosh desktop computers in a way similar to laptops.
