Dairy Production Systems in Ethiopia

The first attempt to introduce modern dairy production in the country was made by the Imperial regime in 1947, when 300 Friesian and Brown Swiss dairy cattle were received as a donation from the United Nations Relief and Rehabilitation Administration. In order to better monitor the national and regional livestock sectors and formulate adequate development strategies, it is essential to develop systematic approaches to accurately assess livestock feed supplies and obtain better insight into how feed resources are being utilized.

A critical review of rural development policy of Ethiopia: access, utilization and coverage

Global Journal of Science Frontier Research: Agriculture and Veterinary, Volume 16, Issue 5, Version 1. Crops and livestock are of similar importance. An Atlas of Ethiopian Livelihoods.

A critical review of rural development policy of Ethiopia: access, utilization and coverage

Extension science, information systems in agricultural development.

Characterization of feeding systems in Ethiopia with a focus on dry areas

In arid and semi-arid lands, there is an acute shortage of feed. All Project Report will be prepared and verified by Certified Consultant. Smallholder producers, which are about 12 million households, account for about 95% of agricultural GDP.

A critical review of rural development policy of Ethiopia: access, utilization and coverage

Many private investors have established small and large dairy farms.

Farming systems and production in Nile Basin

Swiss chard is also much liked and it is served cooked. Baltimore: John Hopkins University Press; 1984.

Farming systems and production in Nile Basin

Animal Feed Resource Information System. It is estimated to boast 56.
