Despite the increasing information on the photochemistry of 2,4-dienone<sup>~~~'</sup> and other unsaturated ketones,<sup>lg9</sup> as well as on the ring-chain valence isomerism of halogen-substituted pyran and dihydropyran systems,<sup>200-201</sup> the data are still very scarce. From the unsubstituted 4-pyrone and dimethyl sulfate, 4-methoxypyrylium salts can be obtained in good yield.
