### Whole School Planning (Post)

If an adult child is receiving need based disability benefits such as SSI, special needs planning will become even more challenging. If social security disability benefits are in question, the law defines disability as the inability to engage in any substantial gainful activity SGA by reason of any medically determinable physical or mental impairment s which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. If there is little need for immediate benefits for the special needs child, this may be a better option.

### Whole Child Approach for Special Student Populations

Adopting a whole-child approach means understanding the social, emotional, mental, physical and academic needs of your students and finding ways to meet those needs as they evolve.

### Whole School Planning (Post)

In order to achieve this, schools will need to adapt their existing special educational needs policies to guide the new approach to the allocation of resources.

### Life Insurance Strategies for Special Needs Planning

Take these three steps to make sure ELs in your district feel supported, engaged, challenged, healthy and safe.

### Whole

The day is shaped to help each child to deal with their sensory processing needs; individual timetables are built so that there are regular sensory learning activities throughout the day to allow the child to remain calm and focused and ready to learn. Any health or personal information shared is protected by applicable HIPAA privacy laws and regulations.

### A whole school approach

Teachers carefully plan highly creative and playful learning experiences embracing the sensory diet of the child. The PLLUSS® curriculum is implemented with learning taking place throughout the total waking day. For children with highly complex needs, the new EHCP is essential.
