**Hans Christian Andersen : The Nightingale**

You can hear it a little bit on that recording, but they sing at 90 decibels. Where are the songs of spring? I have loved all this year Such that I may love no more; I have sighed many sighs, Lemman, for your pity.

**The Nightingale's Song**

So much I think on you That I grow green. And learning from those old singers, you know, I really learned a lot in that art, and here was the nightingale doing exactly the same thing, even better, with such grace.

**When the nyhtegale sings**

After a year the Emperor, his court, and all the other Chinamen knew every twitter of the artificial song by heart.

**Ode to a Nightingale Poem**

And you could leave your state of mind and become unraveled and reconstituted, realigned, affirmed and renewed. My singing with nightingales is one of many ways that we can practice an entwinement with the natural world that can help us identify where that grief is.
