The Reliability of Peer Assessments of Quality of Care

In this research, relocation of a day care center to an enhanced facility including safety and surveillance features, an enclosed garden, and more space for day health programs and activities was associated with positive and negative changes in staff stress and quality of care Lyman 1989. This effect held irrespective of the color or pattern of the cloth cover Namazi et al.

Factors Determining the Quality of Physician Performance in Patient Care on JSTOR

When she could not be contacted the first day by phone, a letter should have been sent then, rather than 11 days later. The relative merits of private versus shared resident rooms is a matter of debate Cohen and Day 1993 ; existing research provides limited guidance on this issue.

Module 17. Electronic Health Records and Meaningful Use

I am unaware of any malpractice cases that have addressed the Internet specifically, but future juries might well conclude the Internet is a readily available source of information and communication that a reasonably careful health care facility should utilize. Catherines, Ontario, Canada implemented this project in a large community hospital system, namely St. Specific Rooms and Activity Spaces This research investigates the design of particular rooms within the facility.

All Case Examples

Residents in facilities with low overall light displayed higher agitation levels Sloane et al. More than 10% of medication orders during the EHR reporting period are tracked using eMAR. OCR's investigation determined that the private practice had relied on state regulations that permit a covered entity to provide a summary of the record.
