Hume moved as an amendment that the ample allowance enjoyed by the Duke of Cambridge should have enabled him to make provision for his children, and that in the present state of the country it was not wise or just to make this a grant from the public money. The Dramatic Review and Weekly Miscellany! This large Beta type engine uses a bell crank mechanism to obtain the correct displacer phasing, burns biomass fuel such as sawdust pellets or rice husks, and can function as a cogeneration unit in rural areas. What appears to be the first mention of a Stirling cycle machine using freely moving components is a British patent disclosure in 1876.
