School of Science and Technology

Students as Lead Investigators Active investigation of phenomena prompts students to ask questions, build models and develop explanations to generate evidence of sensemaking. Ideally, the project should be done right then. In other news, whale earwax collects samples of seawater, providing a record of the ocean pollution the whale encounters.

Home

Thus, when well-established data, from experiment or observation, conflict with a theory or hypothesis, then that idea must be modified or abandoned and other explanations must be sought that can incorporate or take account of the new evidence. The issues of what children bring to school and of how teaching can build on it to foster robust science learning with this rich multiplicity of aspects are the core topics of this report.

Contextual Teaching and Learning of science in elementary schools

Description: -

- Seismology.

Mohorovicic discontinuity.

Medical

Medical / Neurology
