From the time it was written it was regarded as an extraordinary work and was studied by all mathematicians, even the greatest mathematician of antiquity -- Archimedes, and so it has been through the 23 centuries that have followed. We found this book important for the readers who want to know more about our old treasure so we brought it back to the shelves. Different choices of a and b can yield the same line.

Modern Geometry by Durell

It is also known as half-line, a one-dimensional.

Line (geometry)

Circles are to one another as the squares on the diameters.

Browse subject: Sphere

The above form is sometimes called the standard form. This is, at times, also expressed as the set of all points C such that A is not between B and C. The Elements -- Book III Euclid begins with the basics: III-1.

EUCLID, The Elements

We expect that you will understand our compulsion in these books. Other concepts are segments, angles of segments, and similarity of segments of circles are given.
