Furthermore, after 60 years of nuclear power, there is still no solution for safe, long-term storage of radioactive waste anywhere in the world.

## **A review on waterlogging, salinization and drainage in Ethiopian irrigated agriculture**

Striga weed *Striga hermonthica* is a major cause of cereal yield reduction in sub-Saharan Africa and changes in temperature, rainfall and seasonality could result in more suitable habitats for this weed in Central Africa, but the Sahel might become less suitable Niang et al. It is startling that the impacts of policies with such far-reaching impacts for such poor people are, in general, so inadequately assessed.
