Trends in the pharmaceutical sector (includes video)

Also, provide employees with varied, adaptive and flexible roles so they acquire cross-functional knowledge and training.

Biotech in Europe: A strong foundation for growth and innovation

For example, a wide group of pharma companies have come forward with plans of ramping up the production of hydroxychloroquine in light of the increased demand for COVID-19 treatment coupled with export challenges from India. Please see to learn more about our global network of member firms.

Pharmaceutical Industry Trends this Year

These trials are targeting a breadth of diseases including cancer, musculoskeletal disorders, and neurodegenerative diseases. GlobalData expects that both Bayer and Novartis will gain financially from the use of hydroxychloroquine and chloroquine worldwide.

How NLP Will Contribute to the Future of Drug Safety

Many digital health companies are already beginning to incorporate always-on biosensors and software into devices that can generate, gather, and share data. Levelling the Regulatory Landscape In terms of regulation, the most prominent consequence of blurring borders is greater harmonisation. Advances in early detection will likely enable interventions that halt diseases in the earliest stages—before they progress to more serious conditions.

Top 5 Pharmaceutical Trends in 2020

This new foray into drug development is piquing the interest of multinational companies who are swooping in once the drug has passed early phase testing, and adding their expertise in the form of later-stage development, commercialization, and marketing. The company is rapidly developing a clinical trial of the drug in Covid-19 patients.

Facts and figures

And increased regulatory attention could materialize in different ways: Governments could mandate higher minimum safety stocks for select products and start applying heavier penalties for stockouts. Shifting production locations so that production is closer to end markets or in lower-risk countries that are less subject to disruption are now routine considerations in risk mitigation. These tax incentives mean that Ireland has one of the lowest statutory corporate tax locations.
