It is also very well written and will become an indispensable one-volume source for anyone concerned to know about the most important non-domestic institution created by the British during their existence as a single nation. Baden-Powell, if he had read it, would have vigorously agreed with the pamphlet's diagnosis of the nation's ills, which included

the growth of luxury, the decline of taste, the debilitation of the people's health and physique, the enfeeblement of religious and intellectual life, the prevalence of urban over country life, a weakening interest in the sea, the failure adequately to defend the country and the Empire, and the damage caused by excessive taxation and municipal extravagance. The last few chapters focus on the remaining parts of the empire and how they fit into the commonwealth including the struggle with the Falkland Islands.
