It is probable, that the placing of the dispensation of those rewards under some proper discretionary direction, where they may be accompanied by collateral expedients, will serve to give them the surest efficacy. Sutherlin, Robert Beverly, Joseph Cloyd, W. They most frequently find it better to risk oppression, than to avail themselves of so inconvenient a refuge.

Hence, among other proofs, the large loans continually furnished to foreign states. Levi Woodbury, whose career in state and federal politics closely involved him in the ferment of Jacksonian democracy, thought such leadership a genuine responsibility.

Address delivered at the close of the twelfth exhibition of American manufactures, held by the Franklin Institute of the state of Pennsylvania, for the promotion of the mechanic arts, October, 1842

The inquiries to which the subject of this report has led have been answered with proofs that manufactoryes of Iron, though generally understood to be extensive, are far more so than is commonly supposed. And, as shown in a former part of this report, European nations include in this the technical as well as elementary education of the people.

That power, for instance, which keeps our planet in its course, and moves forward all the parts of the solar system in one unceasing and harmonious round, is the very same power which gives mechanical value to a waterfall, causes the plumb-line to take a vertical direction, first raises the vapor which forms the clouds, and then brings it back, in gentle dews and fertilizing showers, to glad-den the thirsty soil! The American Museum, to which H was a charter subscriber, contains many statements of the pre-Revolutionary idea that the establishment of American manufactures would be difficult, if not impossible. A large and well-appointed shop is no small affair as to cost. If it were so that the father or good man of the house had a mat-trass or flock bed, and thereon a sack of chaff, to rest his head upon, he thought himself as well lodged as the lord of the town.

Engineering Education in the 19th Century

The same night which shrouded the genius of discovery seemed to brood over the talent for invention. The radical idea of engineering is contrivance — scheming to use the forces and materials of nature to accomplish, a purpose.
