

Health education - guide lines to materials

Media Resources Centre of the Inner London Education Authority - Components of Sexual Health Education

The screenshot shows a document page with a header 'Discussion key points' and a small icon of a person. Below the header, there are two main sections: 'What is known about the subject' and 'What this study contributes'. The 'What is known about the subject' section contains a bulleted list of four items. The 'What this study contributes' section also contains a bulleted list of four items.

What is known about the subject

- The analytical techniques to evaluate readability included in Word Perfect 7 and Microsoft Word 2000 have been validated for use with Spanish texts.
- These techniques have been used to evaluate informed consent documents, but not to evaluate health education materials.
- No validated techniques are available to analyze legibility.

What this study contributes

- We report on an initial approach to analyzing linguistic readability and typographic legibility of a group of health education documents.
- We provide recommendations for improving the readability and legibility of these materials.
