## Health and Social Care Update

For some clinical investigations, an intervention should be withdrawn gradually or the investigator may recommend follow-up to ensure the subject's safety when an investigational intervention is prematurely terminated due to a subject's withdrawal.

## Health and Social Care Update

To enhance human subject protection and reduce regulatory burden, the Department of Health and Human Services, Office for Human Research Protections and FDA have been actively working to harmonize the agencies' regulatory requirements and guidance for human subject research. This form may be read to the subject or the subject's legally authorized representative, but, in any event, the investigator shall give either the subject or the representative adequate opportunity to read it before it is signed.

## How we develop NICE guidelines

The informed consent process must describe the reasonably foreseeable risks or discomforts to the subject. RESPONSIBILITIES FOR INFORMED CONSENT IRBs, clinical investigators, and sponsors have responsibility for ensuring that the informed consent process is adequate and meets FDA's regulatory requirements.

## Informed Consent

Forms for Documentation of Informed Consent Under 21 CFR 50. If a subject withdraws from a study, removal of data that were already collected may undermine the scientific, and therefore the ethical, integrity of the research.

## Health and Social Care Update

The NHS CB Medical Director Professor Sir Bruce Keogh has announced the names of 21 National Clinical Directors appointed to provide expert advice and research to the national medical directorate on conditions and services ranging from obesity and diabetes to emergency preparedness and critical care.

### **Informed Consent**

However the ad did not breach BCAP Code rule 32.
