Subsistence-Settlement Organisation During the Late Pleistocene - Early Holocene: the Case of Lang Kamnan Cave, Western Thailand. Our core businesses produce scientific, technical, medical, and scholarly journals, reference works, books, database services, and advertising; professional books, subscription products, certification and training services and online applications; and education content and services including integrated online teaching and learning resources for undergraduate and graduate students and lifelong learners. The oldest found contain no bronze and are therefore from a Neolithic culture, the most recent ones are from the Iron Age.

## Janice Stargardt, Satingpra I. The Environmental and Economic Archaeology of South Thailand

The site is at an elevation of 650 m

**Professor Janice Stargardt**

Recent archaeological excavations suggests that was introduced to central Thailand by immigrating rice farming societies about 4000 B. The ancient capital city, ports, canals, monuments and industrial sites have been selectively excavated as part of this interdisciplinary research programme.

**Janice Stargardt, Satingpra I. The Environmental and Economic Archaeology of South Thailand**

The evidence of and bronze fragments have been found in this area. Thani was invited to conduct a palynological investigation of the monument by the Indonesian government and EFEQ. A Holocene pollen record from El Junco Lake, Isla San Cristobal.
