## County of Wellington

Can I get help with questions outside of textbook solution manuals? Yes, there are significant differences between a pre-harvest burn of sugarcane and a wildfire.

## County of Wellington

After the burn, the mechanical harvesters move through the field, cut the sugarcane and load it into a harvesting transport. Hit a particularly tricky question? For instance, prescribed burns are used to reduce the buildup of under-growth in forested areas, which could fuel large wildfires. In addition, just the presence of the leaf-trash blanket can hinder the growth of the sugarcane in future crops.

## A1989.107

The was nearly 20 years old and much has changed since its adoption by County Council in 1993, including the amalgamation of 10 local governments into a single-tier municipality in 1998. Burn permits are issued for many kinds of burning, not just pre-harvest sugarcane burning.

## County of Wellington

A list of resources relating to the Official Plan can be found below, including:

### SAFE: Sustainable Agricultural Fire Education

It is not entirely true that sugarcane is not burned prior to harvest in Brazil and Australia.
