What difference do nonstate actors in international relations such as Greenpeace, Amnesty International, IBM, or organizations of scientists make in world politics? Some major contributions to the debate in the 1970s include: Walter Bühl, Transnationale Politik Stuttgart: Klett-Cotta, 1978 ; Czempiel, Die anachronistische Souveränität; Keohane and Nye, Transnational Relations and World Politics; Harold Jacobson, Networks of Interdependence: International Organizations and the Global Political System New York: A. This debate withered away in the face of state-centered approaches, but this book's new approach emphasizes the interaction of states and transnational actors, arguing that domestic structures of the state as well as international institutions mediate the policy influence of transnational actors. Bringing transnational relations back in: introduction Thomas Risse-Kappen; Part II.
