## Relative sea

. *Tonicella marmorea* O Fabricius, 1780 Family: This large attractive chiton is found only in the northern part of Ireland and Britain. Marine Biology 25: 13-20 ---- 1974b.

## Small Spotted Catshark Fact File

Natural Environment Research Council Publication Series no. This affords space for the body to grow before the shell has to be discarded again.

### **Bathyarca glacialis (J E Gray, 1824)**

In the photograph, these limbs can be seen protruding from the shell and they rhythmically sweep the water above them like a grasping hand.

### **Cumanotus beaumonti sea slug :: Northern Ireland's Priority Species ::**

Clyde River Purification Board Technical Report no. Dredging report - Frith of Clyde. Gigantism in the scallop, *Pecten maximus* L.

## Small Spotted Catshark Fact File

A sublittoral survey of St Kilda. The direct development of the bivalve *Thyasira gouldi*. A femal giant squid *Architeuthis* stranded on the Aberdeenshire coast.

## uk seashells

Some sea cucumbers, like the cotton-spinner *Holothuria forskali* which is a large sausage-shaped sea cucumber, crawl over the seabed eating silty deposits from which it extracts the nutritious organic component.

## **Historical Research**

Report on sampling of 8 sites in the Clyde Estuary. As a result, their presence is most noticeable via their coiled casts which represent processed material ejected by the worm while the small hollow in the sand nearby is where water, for respiration, and fresh sediment is drawn down into the burrow. Transactions of the Natural History Society of Glasgow NS 2: 9-99 ---- 1887b.

## **Plankton bloom, Ireland and Great Britain — European Environment Agency**

Thereafter parental attention is non-existent, and the developing embryos and subsequent fish larvae are left entirely to their own devices in the open sea. Nature Conservancy Council CSD Report no. Oysters normally live from 5-10 years, but up to 15 years.
