

Primary care optometry

Butterworth-Heinemann/Elsevier - Primary Care Optometry

- Primary care practitioner means the practitioner of first contact. That is, the patient attends the practitioner directly, without going through a stage or other gatekeeper system, or referring practitioner.
- Primary Eye care practice of optometry include eye examinations, counseling and education about eye health, prescribing and dispensing eyeglasses, and prescribing medication.
- Why are optometrists the point of first contact? Simple, because they are accessible, and because they are competent to satisfy the vision care needs of at least 95% of the people.
