## Department of Materials Science and Engineering

Air Force product centers, logistic centers, and operating commands rely on the directorate's expertise in materials, nondestructive inspection, systems support, and advanced manufacturing methods to solve system, expeditionary deployment, and operational challenges.

## Research Centers

As a member of the council, your company or organization gets access to all the resources that are required to achieve progress in the world of science. Survey Research Center For nearly 50 years, the Survey Research Center has been a leader in research-based survey design, data collection, methodology and analysis at OSU and in the region as well as nationally.

## Materials and Manufacturing

The Facility serves as a premier hub for materials and device development at OSU, and partners with industry to foster novel technologies and products. Services include analysis of large and small biomolecules, proteins and peptides, biopolymers and synthetic polymers and more. The Materials and Manufacturing Directorate is the only Air Force organization to oversee the entire life cycle of aerospace materials from discovery through processing, development and manufacturing, to sustainment of fielded systems.

## Joint Research Centre

The Center for Nanomanufacturing Systems for Mobile Computing and Mobile Energy Technologies NASCENT develops high throughput, high yield and versatile nanomanufacturing systems to take nanoscience discoveries from the lab to the marketplace. Services include research collection of amphibians and reptiles and frozen tissue samples. Services include training, mentorship and sharing of expertise and resources.
