## Digital Geometry: Geometric Methods for Digital Picture Analysis

So the vector will look like this.

**64313909**

So if you take the yellow vector, minus the green vector. .

## Normal plane (geometry) — Wikipedia Republished // WIKI 2

If I were to give you this, I want to be able to figure out the normal vector very quickly. So I'm going to add positive  $\alpha x\hat{p}$  to both sides.

## Normal plane (geometry) — Wikipedia Republished // WIKI 2

But we're saying that  $xyz$  sits on the plane. That clearly, same logic, can be specified by another position vector.
