## Hearing Aids Richfield and Mound, MN

Hair cells—sensory cells sitting on top of the basilar membrane—ride the wave. Symptoms can include distorted or muffled sound or difficulty understanding speech. Learn more about our assessments and therapies below: Sound Speech and Hearing Clinic is a private speech therapy and audiology clinic located in the Potrero Neighborhood of San Francisco.

## Hearing Aids Richfield and Mound, MN

Please talk to your health care professional about specific questions concerning appropriate care, treatment, or other medical advice. Recreational activities that can put you at risk for NIHL include target shooting and hunting, snowmobile riding, listening to MP3 players at high volume through earbuds or headphones, playing in a band, and attending loud concerts. Fireworks are a summer favorite, but they can seriously hurt your hearing.

### How Do We Hear?

You can easily set a Volume Limit on your iPod and iPhone. Sirens from a fire truck, police car, or ambulance 110 to 129 dB Embedded audio file with an example of a siren. If you understand the hazards of noise and how to practice good hearing health, you can protect your hearing for life.

## Hearing Aids Richfield and Mound, MN

Your brain then interprets these nerve impulses as sound. This partition is called the basilar membrane because it serves as the base, or ground floor, on which key hearing structures sit. Our auditory nerve then carries these signals to the brain through a complex series of steps.
