Chemistry & Chemical Technology

Reaction kinetic studies provide enhanced insight into reaction mechanisms. Use caution when working with them.

Chemical Technology

Credit Units: 2 Course Hours: 30. Keep the flask containing the mixed solution in the ice bath and watch carefully for the blue color to appear.

chemical kinetics

The practical component will include analysis for hardness, pH, sedimentation, etc. Credit Units: 4 Course Hours: 60.

You will use these concepts to examine structure and bonding in typical classes of organic compounds. However, for most technologically important systems, including combustion, pyrolysis, and partial oxidation of hetero atomic mixtures, constructing a reliable and sizable kinetic model remains to be very difficult and time consuming.
