Another interesting result is the detection of a minimum high-level amplification region at 1q12-q22 in HCC. This result provides a candidate amplification region in HCC for further study to identify amplified oncogenes related to the development or progression of HCC. The Journal of Organic Chemistry 2008, 73 23 , 9366-9371.

Zhou zhi longPatents

An air suction unit is disposed in the case body.

Zhou zhi longPatents

Nucleic Acids Research 2013, 41 1 , 302-314. At the same time, adjusting the overflow emissions height of two-sided overflow could delay the settling time of coarse mineral which reduced the content of +200 mesh materials of the overflow discharge lower 5-8 percentage points than the port side overflow.
