### Transportation and the Environment: Energy, Fuels and Emissions

The most obvious way of achieving a reduction in pollution by motor vehicles is to reduce the emission of fumes at source. With reference to water pollution, for example, one could point to the ecological destruction associated with catastrophic, and internationally reported, oil leaks from stricken tanks or the contamination of coastal ecosystems.

### Transport policies — European Environment Agency

There are significant differences in fuel efficiencies between various modes of transport, for example, consumption of energy in cars is more among urban transport modes. We have no references for this item Curb unnecessary ESA litigation by disallowing litigation based on possible development occurring as the result of a proposed transportation project.
