### Sterilization and Disinfection

Wherever patient care is provided, strict adherence to evidence-based infection prevention guidelines is essential to ensure that all care is safe care.

### Cleaning, Disinfection, Sterilization: What Are The Differences?

Disconnect and disassemble endoscopic components e.

### Cleaning, Disinfection, Sterilization: What Are The Differences?

The former includes mainly the noncritical items such as surfaces, floors, and high-contact surfaces sinks, telephones, switches board, bed railings, trolleys etc.

### Disinfection & Sterilization

Humans also use UV radiation for sterilization and disinfection.

### Sterilization and Disinfection

Certain products may require a shorter exposure time e. It is done by exposure to physical and chemical agents, by filtration, and in some cases by use of certain solutions.

### Sterilization and Disinfection

The shelf life of a packaged sterile item depends on the quality of the wrapper, the storage conditions, the conditions during transport, the amount of handling, and other events moisture that compromise the integrity of the package. OPA, glutaraldehyde, and automated process using PAA are the three disinfectants commonly used for the reprocessing of endoscopes. It is observed that regular cleaning of all these housekeeping surfaces dramatically reduces the transmission of the infection.

## **Sterilization and Disinfection**

Hydrogen Peroxide Hydrogen Peroxide is an effective disinfectant and is active against bacteria, yeasts, fungi, viruses, and spores. Hence, drying should be avoided by immersing the equipment in the detergent or disinfectant solution prior to cleaning.
