**Nevada Ghost Town**

Reno, NV: Nevada Bureau of Mines and Geology. The largest operating mine in the Comstock District is the Lucerne Mine near Gold Hill, which produced 222,416 ounces of silver and 19,601 ounces of gold in 2014. Silver Ores and Silver Bearing Minerals Gold and silver are obtained from a variety of ores, in some of which the gold predominates, in others silver is the primary value, while in still a third class these two metals may be mixed with the base metals, such as lead, copper, zinc, and iron.

## Klondex Gold & Silver Mining Company Company Profile

Adapted from the May 2000, Mining History News.

## Summa Silver

The district was not a large producer until the early 20th century. There is no equipment on the ground, and all mining in former years was done by hand methods. Tonopah and nearby Goldfield were part of the Central Nevada precious metals rush that started in 1900.

## Discover Gold & Silver Mining Companies in Nevada

RM: When did they put that railroad in? The town of was established, and in 1863 became the county seat of the newly formed. A great deal of the silver from the gold-silver siliceous ores is obtained with the gold by cyanidation, the silver being recovered by refining the mill bullion.

## Photos of Natural Silver Ore, Silver minerals, Crystal ores, rich Silver quartz specimens

Both of these canyons are on what is now known as the Comstock Lode. With the help of Bill Wahl, Don Southwick, and others, we have attempted to reconstruct photo galleries of many of the sites visited during the conference.

## **Silver mining in Nevada**

Most of the important occurrences seem to have been formed at intermediate depths. In 1859, several prospectors discovered its rich lode silver ore, and a great rush of miners poured eastward from California, and established and , the principal towns of the. Their works were at Arivaca, seven miles from the mines.
