

Receptors and mechanism of action of steroid hormones

M. Dekker - MECHANISM OF ACTION OF STEROID HORMONES

Description: -

- Steroid hormones -- Physiological effect.
- Steroid hormones -- Metabolism.
- Hormone receptors.Receptors and mechanism of action of steroid hormones
- Modern pharmacology-toxicology -- v.8
- Modern pharmacology-toxicology -- v.8
- Receptors and mechanism of action of steroid hormones
- Notes: Includes bibliographical references and index.
- This edition was published in 1976

Filesize: 69.810 MB

Mechanism of Action: Hormones with Intracellular Receptors

Binding of the hormone to the receptor i. Cancer Res 67:6477-6483 Eeckhoute J, Carroll JS, Geistlinger TR, Torres-Arzayus MI, Brown M 2006 A cell-type-specific transcriptional network required for estrogen regulation of cyclin D1 and cell cycle progression in breast cancer. Insulin lowers blood sugar level, while glucagon raises blood sugar level.

How Steroid Hormones Work in the Body

Mol Endocrinol 2:816-824 El-Ashry D, Chrysogelos SA, Lippman ME, Kern FG 1996 Estrogen induction of TGF- β is mediated by an estrogen response element composed of two imperfect palindromes. The shape of Scatchard plots can be linear or curvilinear with upward or downward concavity. FASEB J 10:615-624 Farhat MY, Abi-Younes S, Dingaan B, Vargas R, Ramwell PW 1996 Estradiol increases cyclic adenosine monophosphate in rat pulmonary vascular smooth muscle cells by a nongenomic mechanism.

The Mechanism of Hormone Action

The sequence is highly variable among different receptors. The proteins together with cross-linked DNA are subsequently immunoprecipitated with specific antibodies, e.

Steroid Hormones and Their Receptors

Its product, pregnenolone, moves to the cytosol, where it is converted either to androgens by enzymes of the endoplasmic reticulum. Before publishing your Essay on this site, please read the following pages: 1. Located further upstream are one or more hormone response elements HREs , the specific DNA-binding sites to which steroid receptors bind, conferring hormone sensitivity to the gene.
