Tests & Assessments

The children attended an Italian heritage language class every day for 35 minutes, starting in the first grade. This study analyzes the reading abilities of 81 English-speaking Canadian-born children ages 9-13 who had been exposed to Italian at home, where both languages were spoken by their middle-class parents.

Stanford Achievement Tests

They also supported the conclusion that the SAT Reading subtests have substantial processing demands that involve various factors, including metacognition and attention allocation.
