## **Megestrol acetate**

The medications are able to prevent further scalp hair loss in men and can restore some scalp hair density. MGA can also be used to treat in men, but its generally make it unacceptable for this purpose. No clinical study has assessed the use of progesterone in transgender women, and only a couple of studies have compared the use of progestins specifically cyproterone acetate and medroxyprogesterone acetate versus the use of no progestogen in transgender women.

Similar findings have been found for oral MGA relative to medroxyprogesterone acetate administered via. Gender Dysphoria and Disorders of Sex Development.

## **Expat Dating in Germany**

The improved potency of MGA compared to medroxyprogesterone acetate may be due to increased of MGA afforded by its C6 7 medroxyprogesterone acetate being identical to MGA in structure except lacking this feature.

Pharmacokinetic studies indicate taking these increased doses may lead to a higher boost in plasma estradiol levels; however, the long-term side effects haven't been studied and the safety of this route is unclear. In accordance, and in contrast to progestins, oral progesterone has no antigenadotropic effects in men even at high doses.
