### Science All Around Us: Encouraging your Child's Scientific Curiosity

Make a Bug Vacuum A Lesson in: Entomology Scientists capture bugs for study using a mouth-powered vacuum, called an aspirator or a pooter. And while healthy levels of oxytocin help us bond and feel warm and fuzzy towards our companions, elevated oxytocin can also fuel prejudice. Once sound waves are created, they want to spread out in all directions.

### Love, Actually: The science behind lust, attraction, and companionship

The story is somewhat similar for oxytocin: too much of a good thing can be bad. This germ-growing experiment, which will help kids understand how even the cleanest-looking surfaces and hands can be filled with germs, is one of the easiest science experiments for kids we've found.

### What has science done for you lately?

Michigan State University Extension programs and materials are open to all without regard to race, color, national origin, gender, gender identity, religion, age, height, weight, disability, political beliefs, sexual orientation, marital status, family status or veteran status. We can not truly understand love without the spiritual components.

### The Science of Positive Thinking: How Positive Thoughts Build Your Skills, Boost Your Health, and Improve Your Work

It was Columbus who read in the bible that God created the spherical earth in both Isaiah and the book of Job, that caused him to ask of King Ferdinand and Queen Isabella of Spain. Create your own home lab with just a few household ingredients this experiment will literally cost you just pennies.

logo

Without science, the modern world would not be modern at all, and we still have much to learn.

### Look Around You

Homemade Bubble Wands Sure, you could use those plastic rings that come in store-bought bubble mixes.

### **The Natural World**

Plain old fresh-squeezed lemonade is so last year.

### **Look Around You**

Regrow Leftovers A lesson in: Photosynthesis and plant science. Through reproduction, organisms pass on their genes, and thus contribute to the perpetuation of their species.
