The buildings of this time are transitional - many still have the thick piers and rounded window openings of the earlier Romanesque style. James Wyatt 1746 - 1813 James Wyatt was one of the leading architects of his day. It was a vast cruciform structure with long galleries and an octagonal central hall surmounted by a vast tower 83 metres in height.

The many Viking invasions of Europe and the British Isles marked the era before the Romanesque period. He strove to position his kingdom as a revival of the, now Christian, Roman Empire.

Wyatt combined the use of accurate details adapted from Medieval churches with picturesque effects designed to stir the emotions. In Germany Rundbogenstil, or round-arch style, became popular around 1830, and the style was influential in America, as seen in the Paul Robeson Theater, formerly the Fourth Universalist Church in Fort Greene, Brooklyn 1833-34 and the former Astor Library, now the Public Theatre 1849-1881 , in Lower Manhattan.
