Weights: Integrated Weights and Weight Belts Who has jumped into the water and either sunk straight to the bottom or floated on top of the water even after deflating? After all, who wants to go diving and miss out on all the beautiful marine life underwater? Some divers even use an integrated weight system which has pockets to hold their weights this will minimise or eliminate you having to wear a weight belt. The film on the right is Castle Film 664 and features divers using Voit gear in the clear springs of Florida.
