**Kenya: Breaking the Silence That Led to a High Teenage Pregnancy Rate in a Kenyan County**

The stress of this situation affected her will to eat, which impacted her ability to maintain her antiretroviral treatment ART regime. They will all engage with local men and boys to ensure that they understand

Filesize: 38.29 MB

the importance of family planning for young women of reproductive age in the Mogotio region, increasing the uptake of modern contraceptive methods amongst these young women. Contraceptive Knowledge, Attitude and Practice Among Rural Women.

## Unplanned Pregnancies Are Increasing in Kenya as Family Planning Services Decline

Local leaders in each of the two districts were also invited to review and approve the study. The analysis looked for patterns and associations on the emerging themes, focusing on the drivers and barriers to modern family planning uptake. Dandelion Africa was founded to provide access to information and contraception - to give women a voice and the opportunity to break free from the poverty cycle.

## Kenya

Like studies conducted among women in Kenya, men from rural areas were both less likely to use partner or male methods compared to their urban counterparts. Man's main concern, for a long time, has been with food and shelter. Working papers in African Demography, University Park; 1996.

## Determinants of modern contraceptive use among sexually active men in Kenya

Interviews and focus group discussions were held in audibly private areas.

### **Banish ignorance to end teen pregnancies**

Providing supportive counselling is critical. The ability to talk about their hardships and receive supportive counselling in a caring environment makes a substantial difference in the lives of these young women.

### **App guarantees better family planning service**

They will all engage with local men and boys to ensure that they understand the importance of family planning, increasing the uptake of modern contraceptive methods amongst these young women. Some 26 per cent of teenagers in poor households are likely to fall pregnant compared to 10 percent in wealthier households. Background Spousal communication can improve family planning use and continuation.

#### **(a) Outline five importance of family planning in the community (b) State advantages of family planning**

Most women had secondary education 44.
