## Chromosome Structure and Aberrations

Stuttgart, Germany: Gustav 131 in Annual report 1990. Accurate and timely detection of these PQ events is very essential for corrective measures. La consultation avec les chercheurs des autres institutions internationales et des universités, et en particulier avec les chercheurs des systèmes nationaux de recherche agricole SNRA en Afrique et en Asie, était d'importance primordiale dans la définition des objectifs de cet atelier: déterminer l'importance économique des insectes nuisibles des panicules de sorgho et de mil à travers le monde, et de faire le point des connaissances actuelles fournir des données précises et mises à jour sur des études actuelles sur les stratégies de lutte élaborer des thèmes et des priorités de recherche sur la lutte intégrée contre des insectes nuisibles dans divers systèmes culturels et agroécologiques mettre au point renforcer des liens de coopération et de partenariat entre des instituts nationaux et internationaux ainsi que des universités.
