### List of oil and gas fields of the North Sea

The rates of mean sea level change are calculated by removing the coherent part of the sea level variability from the time series of annual mean sea level before fitting linear trends. This search page should be able to handle large amounts of results +1000 records , but will work best and be easier to navigate when smaller numbers of records returned. Machar was discovered in 1976 and was subject to flow tests in 1994 following a prolonged appraisal.

### Licences UK Continental Shelf

Link to this report if you would like to save information about one well or, for instance, would like to send a link about the well to another person.

### Reducing the Cost of Well Construction on the UK Continental Shelf

Miscellaneous German Records Collection, Pt.

### Reducing the Cost of Well Construction on the UK Continental Shelf

The terms of use for each map is displayed clearly on every page. The gross estimated ultimate recoverable oil resources of the offshore field are 700 million barrels of oil equivalent mboe. Heavily illustrated, it presents an annotated listing of films and portions of films produced by the armed forces, civilian Federal agencies, and commercial newsreel sources.

### Guides and Finding Aids

Records of the National Socialist German Labor Party, Pt. Rates of vertical land movement are approximated by subtracting the mean sea level trends from the most recent regional estimate of change in sea level due to oceanographic processes only. The rates of mean sea level change are calculated by removing the coherent part of the sea level variability from the time series of annual mean sea level before fitting linear trends.

### KY Geode: KGS Oil and Gas Wells Search

The data acquired during the EPS phase of production will help optimise future development phases in order to maximise production from the field. Offshore drilling activity on the UK Continental Shelf UKCS is expected to recover in 2021 with a dozen potential exploration wells identified. The Ninian field is operated using three fixed platforms including the Ninian South and Ninian Central production platforms that also support the operation of nearby Lyell and Columba fields.

#### **BGS maps portal**

The oil field currently comprises four injectors and six producing wells tied back to a floating production facility. II: The General Records 1961 , 180 pp. A coastal nation has control of all economic resources within its exclusive economic zone, including fishing, mining, oil exploration, and any pollution of those resources.
