Innateness and Language (Stanford Encyclopedia of Philosophy)

We will focus on the following question: What evidence is there that children come to the language learning task equipped with a specialized store of inborn linguistic information, such as that specified in the linguist's theory of Universal Grammar? In psychology, a new, non-nativist paradigm for thinking about language and learning has begun to emerge over the last 10 or so years, thanks to the work of researchers like Elizabeth Bates, Jeffrey Elman, Patricia Kuhl, Michael Tomasello and others. It is unclear how to settle such arguments.
