1 Jumbo: Sentient Animal Celebrity

Abstract: Chapter 1 examines how British consumers in the early 1900s made Jumbo an international celebrity by expressing interest in him as a sentient individual who could communicate with humans. A letter-writing campaign and visits to the elephant, women and children, Londoners in particular, delighted the London Zoological Society's Jumbo, whom they referred to as "Topsy" because it denied the elephant's presumed wisdom and intelligence. The book also discusses how Jumbo's fame was used to sell products, and its assumed meaning additionally facilitated consumer generation of animal celebrity. That is, a complex interconnection between Jumbo's fame and consumer culture with the public. The "Jumbo" affair also generated criticism about how humans treated animals, and the resulting awakening skepticism of elephants in Africa to supply ivory for consumer products.
