Geology of the Illawarra and Southern Highlands

The above image shows the hotspot and lavafields of Camden and the Southern Highlands, a few million years may have passed between each lava field.

The bivalves *megadesmus sowerby* and *Astartila dana* from the permian of eastern australia

SHRIMP zircon age control of Gondwanan sequences in Late Carboniferous and Early Permian Australia.

New Pennsylvanian Bivalvia (Mollusca), the Early Permian glaciation and the Carboniferous

Both genera have a single blunt tooth in the right valve and a corresponding socket in the left. The Sydney-Gunnedah-Bown Basin Sydney Basin extends offshore to the edge of the continental shelf and was initiated by rifting in the Early Permian and developed as a foreland basin.

Lower Permian brachiopods from Wasp Head Formation, Sydney Basin, southeastern Australia

Part II: sedimentary rocks Miocene and Pliocene smaller foraminifera from Papua and New Guinea Palaeontological papers, 1965 Australian mineral industry: production and trade, 1842-1964 Geology of the Katherine-Darwin region, Northern Territory Morphology and sediments of the Timor Sea Timor Sea continental shelf sediments map Geology of the Hodgkinson and Laura Basins, North Queensland Tertiary Diprotodontidae from Australia and New Guinea Stratigraphy and vertebrate fauna of the Otibanda Formation, New Guinea The Alcoota fauna, Central Australia : an integrated palaeontological and geological study Isotopic ages of acid igneous rocks in the Cairns hinterland, north Queensland Geology and hydrology, Alice Springs Town and Inner Farm Basins, Northern Territory Permian polyzoa from the Bowen Basin Groundwater in the Barkly

A New Coiled

. This paper provides, for the first time, a full taxonomic and biostratigraphical study of the brachiopod fauna from the Wasp Head Formation, southern Sydney Basin, southeastern Australia.

[PDF] Permian fossils and palaeoenvironments of the northern Sydney Basin, New South Wales

Was the basin formed by rifting, compression or both? The Permian bivalve genera *Myonia*, *Megadesmus*, *Vacunella* and their allies, and their occurrences in New Zealand. SHRIMP zircon age control of Gondwanan sequences in Late Carboniferous and Early Permian Australia.

[PDF] Permian fossils and palaeoenvironments of the northern Sydney Basin, New South Wales

The character of the mass-flow deposits, their stratigraphic position and their lateral extent, are interpreted in terms of destabilisation of a sloping marine surface by pulsed, subsurface thrust propagation. Bivalvos del Carbónico superior del Chubut, Argentina.

Article Search Results

All taxonomic groups are treated, including invertebrates, microfossils, plants, and vertebrates. If the present specimens are accepted as freshwater unionoids, then the larger size of all later freshwater unionoids suggests that the small size of the Driefontein bivalves may also be an example of the Lilliput effect. Bimodal character of the Late Paleozoic glaciations in Argentina and bipolarity of the glaciations.
