Except in certain special cases, free trade results in an efficient allocation of resources and therefore maximizes the value of those resources globally.

Economic and political outline Germany

The political analysis of this subject treats international trade as fundamentally different from domestic economic activity while economic theory sees no important distinction between the two. Hegemonic stability theory argues that stability in the international capitalist economy can only occur when a dominant state, a hegemon, provides the necessary public goods, such as a common currency for settling international accounts.
