Telecommuting and travel: state of the practice, state of the art

IEEE Transactions on Communication Technology Vol.

Remote Work Location and Out

Telecommunications can have complex and difficult to predict impacts on overall vehicle travel.

Impacts of center

In addition to removing the undesirable elements that may be present at the home, telecommuting centers may also offer more opportunity for social or professional interaction. This illustrates the limitation of this data set since it is not known, in general, how frequently the participant returns home at lunch time either when commuting conventionally or when commuting to a center.

Impacts of center

Travel between locations — The costs of voluntary travel to and from a UW worksite for remote teleworkers is the responsibility of the individual employees. · How telecommuting schedules are determined, and what is required to change schedules. Thus, caution should be used in extrapolating these results to the entire population of telecommuters and to the workforce as a whole.

Impacts of center

INDIVIDUAL ANALYSIS OF CENTER-BASED PARTICIPANTS The center-based telecommuting group is small, consisting of only eight participants.

Benefits and Costs Since Telework reduces commute trips it can significantly reduce congestion and parking costs.

telecommuting

Relationships With Other TDM Strategies Telework is often promoted by , programs and.

Telecommuting and travel: state of the practice, state of the art

Further, it is not known whether the telecommuters in this project were representative of all the telecommuters in the region, and it is known and discussed later that these telecommuters are not representative of the general workforce in some important ways. An analysis of personal vehicle usage for this small sample of workers showed that the number of vehicle-miles traveled VMT was reduced significantly as a result of center-based telecommuting from 63.
