Stratigraphic evolution of Silurian

The faults of the east flank of the Gurupá Horst form the western margin of the Marajó Rift. PALEOGEOGRAPHY During the Paleozoic the Marajó region and surrounding areas interconnected the Amazonas and Parnaíba basins as demonstrated by the remnants of Paleozoic sequences preserved in faulted blocks on the shoulders of the Marajó Rift Gurupá Arch; Lima 1987.

Cenozoic paleogeography of the Andean foreland and retroarc hinterland of ColombiaPaleogeography of the Northern Andes

The Jackson School of Geosciences has exceptionally well-funded research programs and offers a number of scholarships to support graduate students for an extended period of time.

Stratigraphy

Phanerozoic paleogeographic and paleoclimatic modeling maps, in A. In contrast, the Post-Rift Sequence deposited during a large quiescence period and received fluvial and deltaic clastics with marine influence in the northwestern of the basin, throughout the Late Cretaceous-Early Oligocene.
