## Newnes Instrumentation and Measurement Pocket Book

The content has also been matched to the latest college syllabuses including the new GNVQ. Discussions focus on exponential functions, partial fractions, Newton's method, direct and inverse proportionality, laws of indices, multiplication and division of binary numbers, reciprocals, square roots, laws of indices, logarithms, and continued fractions. Apart from the popular 8- and 16-bit microprocessors, some details are also given of the popular single chip microcomputers and of the reduced instruction set computer RISC type processors such as the Transputer, Novix FORTH processor, and Acorn ARM processor.
