How to Attract Thrushes to Your Yard

Both parents help in raising the young. They often forage on the ground, searching in leaf litter and on lawns for insects and other invertebrates such as spiders, earthworms, and snails.

Thrush (bird)

I have used each of them, in one way or another, throughout the years in my quest to better identify and understand our fine feathered friends.

Thrushes (Turdidae)

Water Like all birds, thrushes also need to drink, and a fresh, clean source of water can be irresistible not only for drinking, but also for bathing.

Oral thrush

The young hatch after two weeks and leave the nest some twelve days later. They were the driving force in promoting the original international laws, protecting migratory birds.
